

The densed green future

The Green Product Award 2020 Green Product Award & Green Concept Award 2020: Record number of participants with submissions from 52 countries The winners have been determined - the first vegan leather alternative made of cactus, a zero-emission house, a golden dress made of algae, a road surface made of solar panels, and much more.

Berlin, 13. 03. 2020 - The winners of the Green Product Award and the Green Concept Award have been announced. With a record number of 1463 submissions, more participants than ever before have applied. In total, the ideas and products, concepts and materials for creating a more sustainable future come from 6 continents.

Insights into the green future

What does a green future look like and what fits into "Future Village" (award theme)? Winners and nominees will give examples from the categories of architecture, bathroom, electronics, fashion, children, consumer goods, mobility, outdoor, office and interior.

The Green Product Award & Green Concept format provides an insight of what is already possible today and will continue to move the green scene in the future. Three examples:

"Desserto" - Winner Material category

The vegan leather alternative made of cactus is ripe for use in interior covers, clothing and accessories.

The overview of all winners with picture, text & download link to further high resolution pictures can be found here: <https://www.gp-award.com/2020-WINNER-GPAward.pdf>

In the following document you will find all nominees (we call it the Green Selection), sorted by category: https://www.gp-award.com/GPA_2020_Green_Selection.pdf

Awards for a network full of good ideas

The awards not only stand for extraordinary achievements, but are intended to achieve far more. Nils Bader, initiator of the award: *“With the awards we present existing, future and of course sustainable alternatives and network the players. With the exhibition and the talks we want to surprise and show what is already possible. Nobody should go the way he or she came - but in future plan, design and ultimately also consume with a different view.”*

The Jury

The Awards

Since 2013, the international Green Product Award has provided a platform for manufacturers, design studios & agencies whose products & services stand out in the aspects of design, innovation and sustainability.

The Green Concept Award - in cooperation with the IKEA Foundation - is aimed at students, start-ups & companies who want to present their green concepts, network and grow together
